Healthcare Interior Design

Pharmacy Pullout Shelf

A full height shelving module can take up to 10 pullout shelves for maximum stock density. Shelving units can be easily linked to create longer runs which suit the space available. Modules will also lock together back to back to create a free standing island unit.

- Pullout shelves - extend fully on heavy duty drawer runners to allow easy access to rear.
- Plastic dividers help ensure that different products, strengths and formulations do not become mixed or confused.
- The angle of the shelf allows the stock to slide forward ensuring "first in, first out".
- All shelves can be locked in the open position - ideal for restocking.
- Reduced depth shelves - place above the work surface for handy storage that doesn't interfere with dispensing operations.
- Half width shelves and base plinths create a smaller module so that all available space can be used.
- Flexible labelling system helps identify stock location quickly. Use A-Z or insert your own labels.
- All shelves can be fitted into the system in a horizontal position if required.
- Stock up to four times more than traditional flat shelving.
- The use of sloping pull-out drawers that enable stock to be seen and easily retrieved may also help reduce selection errors.

Dimensions

	Height	Width	Depth
Pullout Shelf	50mm	718mm	520mm
Reduced Depth Pullout Shelf	50mm	718mm	350mm
Half Width Shelf	50mm	335mm	520mm

Pharmacy Storage Drawers

The pharmacy deep drawers have been design for storage of bulkier items and finished prescriptions.

- Heavy duty drawer runners mean that up to 50kg can be stored in each drawer.
- Optional lid improves data protection when used with finished scripts or creates an extra temporary work surface ideal for re-stocking.
- PVC label holders help to create a finished prescription retrieval system or insert your own labels for quickly identifying stock positions.
- Base plinth storage unit takes bulkier items and is removable to aid floor cleaning.

Pharmacy Work Surfaces

- Hard wearing integrated work surfaces that are adjustable in height to provide ergonomically suitable conditions.
- Grey colour contrasts well with white pills.
- The work surfaces are located into the slotted upright system so could be moved in future if work flow developed or changed.
- Sink unit can be fitted into top.
- Upstand at rear will take electric sockets to provide power close to where you need it.
- Retractable work surfaces - Handy surface that pulls out when needed and is safely stored at all other times.

Design Services

Our designers can offer expertise in designing pharmacies, surgeries and healthcare facilities. With vast experience in both new build facilities and refurbishment of existing installations our designers are well placed to offer the best services possible.

Process

1. Preliminary Discussions

Start the design process by providing as much information as possible about the premises, send sketches, plans or photos to sales@pharmacy-shelving.co.uk. Better still call us at an early stage of your project and a sales consultant will explain exactly what is needed to achieve best results.

2. Requirements & Process Flow

Specific requirements need to be discussed early in the project to avoid re-working designs. When designing the latest NHS regulations guidelines are always taken into account. A typical dispensing pharmacy process flow is shown in the diagram below:

3. Site Visit

It is not always necessary for FPD to visit your site. Providing accurate plans and photos are made available, specific requirements can be discussed during phone sessions alongside electronic transmission of draft ideas. FPD have successfully managed pharmacy equipment projects in the UK and Overseas, assisting both main contractors and end users without ever visiting premises, our methodology saves time and money for all parties involved.

4. Delivery and Installation

Our job is to make sure your all equipment is received safely and when promised. FPD Group Ltd will make sure fitting teams are provided with adequate instructions and telephone support during installation. Most FPD systems sold are relatively easy to erect, we recommend a professional carpenter or experienced installer is selected in advance of any delivery, our sales team will support this contractor and make them aware of any additional fixings or special tools needed to complete works.

Pharmacy Shelving Exports

Since 1961 FPD Group Ltd's family have been supplying specialist storage equipment. Our extensive experience and technical knowledge now concentrates on providing clients with a quality selection of products for hospitals and healthcare organisations worldwide. We receive export enquiries and orders from all parts of the world and have established customers in UK, Europe, Africa and Asia. Export business activities are supervised by either our UK or Asia offices.

Our client base ranges from overseas ministry of health, defence, hospitals, surgeries, clinics and doctors to aid agencies and disaster relief. FPD Group Ltd export almost any medical product listed on our websites.

FPD estimators have the expertise to supply a single item or to fully equip many types of healthcare facilities. As well as the initial supply of equipment we also offer room design services using our in-house Autodesk Revit Architecture 2013 CAD systems.

** Export items are normally subject to minimum order values, additional protective packing charges and export shipping costs. Prices shown are Ex Works unless otherwise agreed in writing.*
